| 6 <sup>th</sup> May<br>Saturday |             | Departure  |

Every country is supposed to prepare when coming to a project meeting in Lithuania.

Responsible Consumption is when people **consume in moderation** giving the Earth another year. Every partner **school prepares a presentation** of a Project related topic, how it uses natural resources at the same time saving the environment for future generations. Including its **local area specifications, the country** identifies the major **problems** of its local surroundings and provides **solutions done or could be inspired** by the project activities. Use your creativity skills to make your presentation, it could involve investigation, video clips, interviews, slides, photos etc. Students are encouraged to be original and artistic!
